Wiring terminal block - for DALI / Emergency / Tunable White versions

Design iGuzzini **iGuzzini**

Last information update: February 2025

Accessory code
PD07: Wiring terminal block - for DALI / Emergency / Tunable White versions

Technical description
Terminal block made of coupled elements. Designed for direct wiring between ceiling-mounted base power cable - pendant installation - and light module driver box. The terminal block also allows a junction to be made to a successive module to create a serial connections function - using additional terminal blocks - up to the maximum electrical capacity permitted by the individual power supply point (for more detailed information, see the instructions sheet).

Colour
Black (04)

Wiring
Built-in safety cable clamp and anti-detachment device. Screw locking terminal clamp connections.

Complies with EN60598-1 and pertinent regulations
