RN89.R4: Ceiling-mounted luminaire - Ø172 - UGR < 19 - White/Trasparent/White Transparent

Technical description

Direct light luminaire - ceiling-mounted installation. LED lamp with high color rendering index - controlled luminance emission $L < 3000 \text{ cd/m}^2$ - UGR < 19 - ideal for use in environments with video monitors. The light emission unit is made of PMMA and consists of a transparent prismatic reflector combined with a flux enhancer and diffuser screen - an internal polycarbonate cover defines the optical assembly visually. The twin-part external structure of the lighting body is made of machined aluminium - with a uniform or combined paint finish. The practical bayonet coupling system allows the two sections to be separated to perform wiring operations - a steel retaining cable stops the section from falling when divided. DALI dimmable power supply unit integrated in the lighting body.

Installation

ceiling-mounted directly on the structure that can be separated into two sections with a bayonet coupling system.
