## DALI programming interface

Design iGuzzini

iGuzzini

Last information update: October 2023

### Accessory code

X673: DALI programming interface

---

### Technical description

Kit complete with programming USB interface module and dedicated DALI power supply unit.

To program DALI Tridonic power supply units via the relative software.

Interface current absorption: 6 mA.

Current supplied by the DALI power supply unit included: 200 mA.

---

### Colour

Indeterminate (00)

### Weight (Kg)

0.2

---

### Wiring

The USB interface module is fitted with a cable and a USB-A terminal for connecting directly to a Personal Computer.

The DALI power supply unit must be wired for 230 Vac and connected to the programming module using the appropriate DALI clamp.

---

### Notes

Complies with DALI IEC 60929 and IEC 62386 standards.

Complies with EN60598-1 and pertinent regulations

IP20

---

### Technical data

Control: DALI-2
