**Accessory code**

PE00: Base unit for pendant - Ceiling-mounted luminaire - Ø172-Ø234

---

**Technical description**

Base unit for pendant/planned power supply of the structure - surface version. Shaped steel plate for coupling to the ceiling - polycarbonate covering rosette. The pre-arranged wires - L 2,500 mm - simultaneously act as suspension and power supply - the adjustment to the length and the wiring is done in the upper section of the light unit, complete with connection terminal board and safety cable clamps. Sliding devices, to be positioned along the length of the cables, allow the pendant to be aesthetically shaped.

---

**Installation**

steel plate for coupling onto the laying surface with screws and anchors (not included)

---

**Colour**

White (01) | Black (04)

---

**Weight (Kg)**

0.22

---

**Wiring**

connection to the network with quick coupling terminal board positioned on the base unit plate - adjustment of the power/pendant cables and further wiring to be done on the upper section of the light unit, arranged with connecting terminal board and safety cable clamps.

---

**Notes**

The power supply driver is incorporated into the light unit - the base unit includes pendant wires that conduct electricity.

Complies with EN60598-1 and pertinent regulations

**IP40**
